

THE MARK OF WHEATNET-IP

WHEATNET-IP BLADES. NETWORK BEYOND THE CUTTING EDGE.

WHEATNET-IP When it comes to Audio-over-IP networking, simple, powerful and modular is what cuts it. Making its mark in its first year, our WheatNet-IP system is installed in facilities worldwide, with many more being added every month. Boldly sporting a new name, WheatNet-IP, along with its hardware and software BLADEs, reflects its proven Wheatstone heritage and ability to cut straight to the point.

WheatNet-IP makes it easy to connect and configure full multi-studio/control room complexes with consoles and mixing, large router-only systems, and point-to-point digital snakes. Hardware BLADEs, the WheatNet-PC software driver for your automation and Internet computers (no expensive sound card required!), and Wheatstone consoles all quickly interconnect with standard Ethernet cables and a standard Ethernet Gigabit switch. There's

even a new MIC BLADE to accommodate up to eight studio mics. Configuration is seamless too, each BLADE self-addresses and knows what to do just by being plugged in and quickly set with the front-panel wizard. Fine tune your system by plugging a PC into your network and, using the Navigator software, do a little bit of naming and customization. Once set up, unplug your PC and put it away.

While other systems get more and more complicated, cramming unrelated functions into a single overweight and over-vulnerable box, WheatNet-IP leads with powerful simplicity. Now that's sharp thinking!

Don't lose your edge. Stay sharp AND slash your budget with the power, simplicity, and cost-effectiveness of WheatNet-IP. It makes your life less complicated, and we wouldn't have it any other way.

Audio Networking—Simply Evolved
